

DEPARTMENT OF MATHEMATICS  
CENTRAL UNIVERSWITY OF KEREALA  
PERIYE, KASARAGOD

Minutes of the Second Board of studies meeting held on Thursday, 7<sup>th</sup> February, 2019 in the Department of Mathematics in Room No. 28 at 2.30 p.m.

*The following members were present:*

1. Prof. Gadadhar Misra,  
*Department of Mathematics,  
Indian Institute of Science, Bangalore – 560 012.*
2. Prof. A.K. Nandakumaran,  
*Department of Mathematics,  
Indian Institute of Science, Bangalore – 560 012.*
3. Prof. A. R. Rajan, Emeritus Professor,  
*Department of Mathematics, University of Kerala,  
Thiruvananthapuram, Kerala – 695 581.*
4. Mr. V. Kumar, Assistant Professor,  
*Department of Computer Science, CU Kerala.*
5. Dr. V. Vilfred, Associate Professor & Head,  
*Department of Mathematics, CU Kerala.*
6. Dr. K. A. Germina, Associate Professor,  
*Department of Mathematics, CU Kerala.*
7. Dr. Ali Akbar K, Assistant Professor,  
*Department of Mathematics, CU Kerala.*

The Meeting started at 2.30 p.m. The Chairperson Dr. V. Vilfred welcomed the members and submitted the modified Course Structure and Syllabus approved by the Faculty Council, Department of Mathematics, CU Kerala. Then, he briefed how and what modifications were done in the communicated Course Structure and Syllabus.

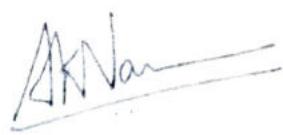

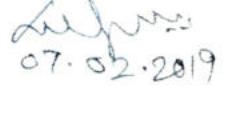

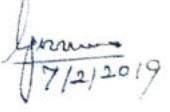

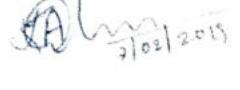

With the permission of the experts in the Board of Studies, the convenor invited Dr. Shaini P, Dr. S. Gnanavel and Dr. Manikandan Rangaswamy to join the BoS Meeting. The committee commended on each and every paper and also on the course structure. The whole structure and Syllabus was thoroughly discussed. The revised version of the same was prepared and submitted for the approval. The Members of the Board of Studies approved the revised Course Structure and Syllabus. (A copy of the approved Course structure and Syllabus is attached herewith.) The committee decided to implement the revised course structure and syllabus from the academic year 2019 - 20 onwards.

The members also commented on the Method of Evaluation of M.Sc. Mathematics Programme and requested to include the same in the minutes. The experts strongly recommended that the mode of evaluation of examinations should be strictly internal.

The members of the BoS seriously noted the current strength of intake at CU Kerala to M.Sc. Maths programme that is increased to fourty seats and strongly recommend that for quality teaching the number of teaching faculty in the Department of Mathematics should be increased sufficiently since present strength of seven faculty is quiet insufficient.

The meeting was fruitful and Dr. K.A. Germina thanked the experts for their valuable suggestions and guidance.

The meeting came to a close at 5.00 p.m.

1. Prof. Gadadhar Misra,  
Department of Mathematics,  
I.I.Sc., Bangalore – 560 012. 
2. Prof. A.K. Nandakumaran,  
Department of Mathematics,  
I.I.Sc., Bangalore – 560 012. 
3. Prof. A. R. Rajan, Emeritus Professor,  
Department of Mathematics,  
University of Kerala, Trivandrum, Kerala – 695 581, 
4. Mr. V. Kumar, Assistant Professor,  
Department of Computer Science, CU Kerala. 
5. Dr. V. Vilfred, Associate Professor & Head,  
Department of Mathematics, CU Kerala. 
6. Dr. K. A. Germina, Associate Professor,  
Department of Mathematics, CU Kerala. 
7. Dr. Ali Akbar K, Assistant Professor,  
Department of Mathematics, CU Kerala. 

Course Outcome(s)	Upon completion of the subject, students will be able to: Apply the concepts of probability, conditional probability and conditional, expectations. Calculate probabilities, moments and other related
-------------------	--

	quantities based on given distributions. Understand and apply the laws of large numbers and central limit theorems, martingale limit theory, Brownian motion model.
--	---

**Syllabus:**

Probability measures and random variables, pi and lambda systems, expectation, moment generating function, characteristic function, laws of large numbers, limit theorems, conditional contribution and expectation, martingales, infinitely divisible laws and stable laws.

**Text books:**

1. Durrett R., Probability: Theory and Examples, Cambridge University Press, 4th Edition, 2010.

**References:**

1. Billingsley P., Probability and Measure, 3rd Edition, Wiley India, 2008.
2. Kallenberg O., Foundations of Modern Probability, 2nd Edition, Springer-Verlag, 2002.
3. Walsh J., Knowing the Odds: An Introduction to Probability, AMS, 2012.

Code:MAT5019: Queueing Theory	L	T	P	Credit
Prerequisites: Basic Probability	3	2	0	4

Course Category	Elective		
Course Type	Theory		

Course Objective	To develop the modeling and mathematical skills to analytically determine computer systems and analytically determine computer systems and communication network performance. Students should be able to read and understand the current performance analysis and queueing theory literature upon completion of the course. Understand strengths and weaknesses of Queueing Models
Course Outcome(s)	Construct models in discrete and continuous time based on Markov Chains, describe and explain the theory of Markov Chains, describe and motivate Little's formula and its applications, describe and analyze basic Markov queuing models and situations to which they may be applied apply Markov models for selected applications.

**Syllabus:**

Probability and random variable, discrete and continuous, univariate and multivariate distributions, moments, law of large numbers and central limit theorem (without proof). Poisson process, birth and death process, infinite and finite queueing models  $M/M/1$ ,  $M/M/C$ ,  $M/G/1$ ,  $M/M/1/N$ ,  $M/E/1$ ,  $E/M/1$ ,  $M/G/1/N$ ,  $GI/M/1$ , and more complex non-Markovian queueing models -  $GI/G/1$  queues, Multiserver Queues:  $M/M/c$ ,  $M/G/c$ ,  $GI/M/c$  models, Erlang's loss system, Queues with finite populations:  $M/M/1/N/K$ ,  $M/G/1/N/K$  etc. models and Engset formula, Concept bulk queues:  $M[X]/M/1$ ,  $M/M[Y]/1$ ,  $M/M(a, b)/1$ ,  $M[X]/G/1$ ,

GI[X]/M/1, M/G(a, b)/1, GI/M(a, b)/1 etc. queueing models. Priority queueing models, Vacation queueing models, Network of queues, finite processor sharing models, central server model of multiprogramming, performance evaluation of systems using queueing models. Concepts of bottleneck and system saturation point. Introduction to discrete time queues and its applications.
<b>Text books:</b> 1. Gross D. and Harris C. M., Fundamentals of Queueing Theory, Wiley, 2012.  <b>References:</b> 1. Kleinrock L., Queueing Systems Volume 1 : Theory, Wiley, 2013 . 2. Kleinrock L., Computer Applications, Volume 2, Queueing Systems, Wiley, 2013.
