Three Day workshop on Digital Learning and Curriculum Transaction

15-02-2018 to 17-02-2018

St.Albert's college Ernakulum

Report

The objectives of the programme, Three day workshop on digital learning and curriculum transaction, which was a two day programme were to:

- To develop the essential understanding and skills needed for effective curriculum designing through technology.
- To develop in the participants required competencies to integrate digital learning in their classroom practice specific to their own disciplines with an aim to enhance quality of curriculum transaction.
- To provide a forum for faculty of Higher Education institutions to discuss and reflect on the modern technological innovations and experiences and integrate the latest technological tools in one's classroom teaching
- To get acquainted with SWAYAM platform and development of MOOCs.

The workshop was able to develop in the participants required competencies to integrate digital learning in their classroom practice with an aim to enhance quality of curriculum transaction. It provided a forum for faculty of Higher Education institutions to deliberate on innovations and experiences related to MOOC, platforms like MOODLE and SWAYAM, Open Educational Practices (OEP) including Open Educational Resources (OERs), Free and Open-Source Software (FOSS), Mobile apps, e-content development etc. as well as to plan using these

practices in their specific teaching situations. The workshop provided a platform for the faculty to reflect upon open technologies that facilitate collaborative, flexible learning and the open sharing of teaching practices that empowered educators to benefit from the best ideas of their colleagues. The workshop also included talks by eminent educationists who shared their expertise in the field of digital learning and curriculum followed by group discussions, group activities, session specific training exercises and so on. 33 participants attended the programme. 4 resource persons from all across the country delivered lectures and interacted with the participants. The feedback from participants shows that the programme was very effective.

**CENTRAL UNIVERSITY OF KERALA
CENTRE FOR LIFE SKILLS EDUCATION**

**National Seminar on
MAINSTREAMING LIFE SKILLS EDUCATION IN
EDUCATIONAL INSTITUTIONS:
CHALLENGES & PROSPECTS**

18th and 19th December 2017

At

School of Education, Central University of Kerala, Vidya Nagar, Kasaragode

Life skills are the psychosocial abilities for adaptive and positive behaviour that enable individuals to deal effectively with the demands and challenges of everyday life. It is a set of skills that are necessary or desirable for full participation in everyday life. Life skills education aims to reinforce existing knowledge, positive attitudes and values, pro-social and healthy skills and behaviour. It helps to prevent or reduce myths and misinformation, negative attitudes and risky behaviours. Life skills helps to develop a dynamic self-image and great self-esteem, improve the communication skills, make relationships better and handling interpersonal problems, boost our decision making ability and make informed decisions, deal with the challenges of everyday life and become a well-adjusted individual. Life skills training are considered as a tool to develop capacities and competencies of the individuals. As a preventive tool life skills education enables adolescents to prevent violence, HIV/AIDS, early marriage and pregnancy, substance abuse, sexual abuse, vehicle injuries, domestic violence and negative peer pressure, reproductive sexual health, etc. Life skills are not a complete remedy for all deviant behavior, but it is proved as a very effective methodology in developing the capabilities and competencies of youngsters.

The development of essential life skill is a lifelong process that starts from infancy and continues throughout the life. Life skill education is a comparatively new domain. There are comparatively meager intellectual discourses on such a vital concept. At this juncture the School of Education proposes to launch the Centre for Life Skills Education to undertake research, teaching and training programs in life skills education and to propagate the need and importance of life skills education in the country. As a prelude to its activities, a two day national seminar on life skills education is being organized at Central University of Kerala by inviting experts and other stake holders across the country to brainstorm on various strategies to integrate life skills concepts into general education in the country.

The overall aim of this seminar is to unveil the proposed Centre across the country and to showcase the potentials of the Centre as a nodal Centre for life skill education. The objectives the seminar is:

- To address the need of linking education and skill development with emphasis on the strategies for harnessing the potential of youth towards developing employable skills
- To explore how ICT can be utilised for effective learning outcomes and taking learning beyond the boundaries of schools, colleges and universities extending at national and international levels integrating life skills

- To emphasise the need for life skill education to address and bridge the disparities in education with respect to gender, locale and socio-economic aspects in schools and higher education arena
- To recapitulate the crucial role of HEIs in societal development by strengthening the linkage between institutions of higher learning with the society enabling the stake holders competency development
- To share ideas and experiences on revamping Teacher Education for the development and promotion of teacher professionalism and academic leadership for fostering quality teachers in schools and HEIs to facilitate capacity building among their students through life skills integration
- To provide a venue for discussing the strategies for promoting life skill education envisaging cross border HE for enriching the quality of teaching, learning and research for meeting global demands to attain the sustainable developmental goals
- To analyse the strategies for developing aptitudes and capabilities of research among teachers and learners with due emphasis given to the building teaching-research nexus at schools and HE levels in the domain of life skill education for sustainable living
- To suggest ways for ensuring better learning outcomes at all levels of education through new knowledge creation, pedagogies and approaches for teaching different subjects by integrating with life skills
- To provide a platform for sharing the reflections and best practices of assessment and evaluation thereby suggesting new ways to improve and reform the examination systems in schools by considering life skill competency as a potential indicator
- To discuss life skill education as an emerging system of learning for quality, equity and access providing vibrant platforms for all the stake holders and there by strengthen the extension arms of higher education institutions,.

Teachers workshop on Teaching with Technology

14-10-2017 to 15-10-2017

Report

Technology has become an integral part of our life and learning patterns in the 21st century. Teachers need to understand the role of technology in the learning process, and the principles behind integrating it in a way that it promotes learning without it being a distraction. The 21st century classroom is student centered, not teacher centered. In this context we are happy to inform you that our CCRPED under PMMMNMTT, SoE has got the privilege to organize a two day workshop on “teaching with Technology” for the Highschool Teachers. This workshop is intended to discuss the concepts and ideas behind using technology in the classroom. It also helps teachers to understand the various skills that students need to develop in order to use technology in the most effective way. It equips teachers to help students use technology intelligently and with responsibility. The aim of this workshop is to upgrade the teaching, training and content development skills of teachers in high school for integrating technology. This workshop provides a hand on training for the participants to use the latest technological tools.

Participating in the workshop, participants will be to:

- Apply models of technology and pedagogy integration to a unique instructional challenge or opportunity
- Share their solution, its implementation, and its strength and challenges with fellow participants

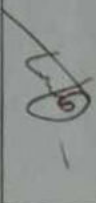

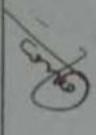

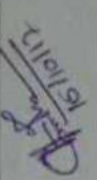

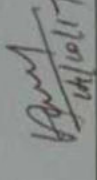

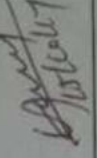

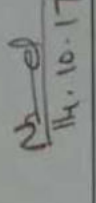

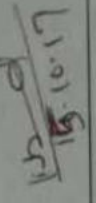

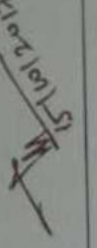

- Design develop and implement a learning solution incorporating technologies in their own course
- Utilize the 21st century technologies in their teaching and learning
- Demonstrate their understanding of instructional design principles as they relate to face-to-face and flipped learning environments

Workshop on Curriculum Transaction through Open Educational Resources (OER)

31st July and August 2017

Report

The main Objective of the workshop on “Curriculum Transaction through Open Educational Resources(OER)” with the academic support from Commonwealth Educational Media Centre for Asia(CEMCA) was to develop and ascertain policy changes in the educational, especially curricular innovations through Open Educational Resources, there by university had a repertoire of educational materials including the real time teaching sessions of senior professors, born teachers and the quality teacher aspirants. The program was facilitated the teachers to Central University Of Kerala to develop competence to understand recent advancement in teaching methodology ,effective presentation techniques and the Technical skills to be integrated for the recent Paradigm shift in education from the real classrooms to MOOC’s. Further at the extension of the program University had taken up steps for developing the OER policy and make the content and the knowledge is generated in its classrooms open for all. MHRD in its latest policy had taken many initiatives to implement OER policy throughout the higher education institutions in India so this program has got multifaceted advantages on its execution.

Objectives of this program were to:

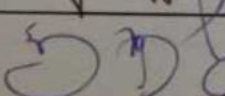

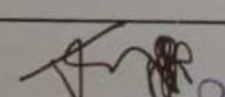

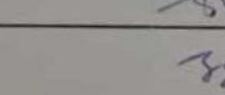

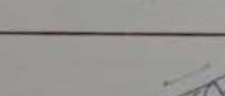

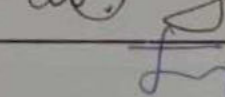

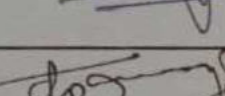

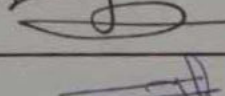

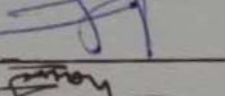

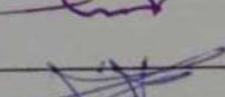

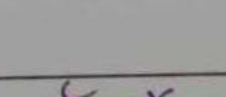

- initiate the idea of free education through virtual classrooms
- Equip the knowledge database of teachers through training in OER

- understand the importance of OER policy in higher education institutions in India
- Integrate the latest technologies into the normal classroom teaching
- Comprehend that knowledge to prepare a repertoire of OER resources
- Get trained with open resources and licensing of open educational materials.

40 participants attended the programme. 4 resource persons from all across the country delivered lectures and interacted with the participants. The feedback from participants shows that the programme was very effective.
